## The Cardboard Camera Obscura

- 1. Find two sheets of card, one 42x42cm and the other 38x26cm.
- 2. Get a cheap plastic magnifying glass with 4x magnification.
- 3. Mark up the card as shown in the diagrams. Double check your measurements.
- 4. Cut out the card leaving the shaded areas.
- 5. Cut the round hole slightly smaller than your lens so it can be glued on.
- Fold up the longer, outer sleeve with the long tab on the outside.
- 7. Fold up the shorter, inner sleeve with the long tab on the inside.
- 8. Tape or glue all the tabs in place.
- 9. Fix the lens to the hole using strong glue or tape.
- 10. Cut out a 9x9cm square of tracing paper and affix it to the inner sleeve.
- 11. Slide the sleeves together until the image is in focus.
